

Follow Up After Hospitalization for Mental Illness (FUH) – 7 Days

What is Measured

The percentage of discharges for members 6 years of age and older who were hospitalized for treatment of mental illness or intentional self-harm diagnoses and who had a follow-up visit with a mental health provider. Two rates are reported:

1. The percentage of discharges* for which the member received follow-up within 7 days after discharge.
2. The percentage of discharges* for which the member received follow-up within 30 days after discharge.

* If members have more than one discharge, all discharges during the first 11 months of the measurement year are included in the denominator.

Allowable Codes

Visit Setting Unspecified

CPT (must be billed by a mental health provider; see list of Mental Health Provider Types and Specialties below):

- 90791 – Psychiatric diagnostic evaluation
